Management Comments (29/03/18)

March has, once again, been a complicated month for financial markets. The equity market, in a volatile environment, has closed in negative. The Nasdaq has been one of the indexes most affected with significant decreases after maximum values, and a monthly return of about -4%, and most European indexes have seen drops of over -2.5%.

Added to the inflation uncertainties in Central Bank's monetary policies, we have the announcements made by Trump regarding taxing steel and aluminum imports and the resulting reactions from other countries, such as China and the Euro Zone.

As expected, the Federal Reserve increased interest rates in 1.75%, making it clear that the FED will probably close this year increasing rates to at least 2.25%.

The Fund was practically flat this month, with a return of +0.02% after fees. The positive part came from the appreciation of the Canadian dollar against the yen, Swiss franc and New Zealand dollar; and the negative part mainly as a result of the Euro increasing against the Australian dollar. During the month, we have been increasing long positions of Canadian dollar and short positions with the Euro against other currency pairs.
