Management Comments (28/02/18)

February has brought back uncertainty and volatility. Equity markets have closed this month with drops of 4% to 6%. Strong unemployment data from the U.S.A. implied doubts regarding tightening monetary policy by the Federal Reserve, which resulted in sharp drops during a very short period of time throughout equity markets. This extremely volatile scenario benefited the fund, mainly due to long positions with the American Dollar against the other currencies. Tactical, shorter term positions of the Australian Dollar/Japanese Yen and New Zealand Dollar/Swiss Franc have withstood well portfolio returns.
