Management Comments (31/07/18)

There have not been any great surprises in the decisions issued by some Central Banks from the economies of the currencies we trade in. The ECB maintained interest rates at 0% and expects to keep them there until, at least, next summer. It will also continue purchasing assets (30,000 million per month) until September 2018, when it plans to reduce this to half and complete the purchase in December 2018. On the other hand, the Fed kept interest rates at 2% with the expectation of increasing them twice more this year due to strong growth in their economy. The BoJ also kept interest rates at -0.1%, but did announce adjustments in their monetary policy in order to obtain an annual inflation of 2%. The Bank of Canada, however, ignoring commercial tensions at the moment, decided to increase their interest rates by 0.25% until 1.5%, as their inflation has been the highest for the last seven years.

The fund closed the month with a positive return of 0.77%. This month we have had positive returns with tactical positions in EUR/JPY, both long and short, and the same with CHF/JPY. The best contributions to performance came from long positions in New Zealand dollar against American Dollar, Swiss Franc and Pound. The negative positions have been long positions of Australian Dollar against American Dollar and Japanese Yen.

Data Analysis

Time Period	Percentage positive return
Within 1 month	80.0%
Within 2 months	88.4%
Within 3 months	95.2%
Within 6 months	99.2%
Within 9 months	99.7%
Within 12 months	100.0%
