Historical Evolution

Management Comments (10/31/19)

During the month of October we have witnessed a less volatile market, where the fear of a hard Brexit disappeared as the UK and the EU reached a new agreement and a new delay was finally granted, while elections will finally be held in December. As well, Trade War conceded a certain respite, at least short term.

Central Bank's actions, mainly the new FED rate cut, contributed to the general improvement in sentiment.

This scenario favored gains in GBP, AUD and NZD vs JPY and CHF, which we were holding in the portfolio. In the case of GBP, during the month we have completely closed our longs and are actually holding some short positions. The fund ends October with a gain of +4.8%, which means we are again positive YTD.

Given actual opportunities we expect to see good performance going forward.
