Historical Evolution

Management Comments (09/30/19)

The evident economic deceleration globally is keeping Central Banks in an accommodative way. During the month of September the FED cut rates to 1.75%, the ECB pushed the deposit facility even more negative to -0.50%, BOE advanced a possible rate cut in the near future and, lastly, during the first days of October the RBA cut rates to 0.75% as expected.

The fund ends September +3.1%. Geopolitical risks keep dominating the landscape. After the bombing of Aramco's oil installation, we saw oil price's biggest daily move since 1991.

The apparently good disposition of the USA and China to reach an agreement and the legislation passed by Parliament in the UK to stop a hard Brexit calmed market temporarily and we saw a generalized recovery of GBP, as well as AUD and NZD during the month of September. On the other side, the appreciation of "save havens", namely JPY and CHF, also reversed course.

Data Analysis

Time Period	Percentage positive return
Within 1 month	73.4%
Within 2 months	80.0%
Within 3 months	84.8%
Within 6 months	93.2%
Within 9 months	96.1%
Within 12 months	97.3%
